

# Participant Debriefing Form

**Project Title**

Posture Behaviour at Home

**Researcher(s) Name(s)**

Ching Su

**Supervisor's Name**

Aaron Quigley

[aquigley@st-andrews.ac.uk](mailto:aquigley@st-andrews.ac.uk)

**Nature of Project**

This master research project was conducted to investigate the properties of different postures, the posture pattern in a scenario (either watching TV or using the mobile devices), and the attitude to the posture feedback. The data collected from the posture measurement section would be used to model the posture, and the data from the scenario study section would be used to analyse the posture behaviour pattern of the scenario, which can present the frequency of having different posture and indicate the potential harm of different posture to human health. The whole procedure involves no deception. The result of the experiments would be help on building a system that can both detect and classify the postures, and provide appropriate feedback to improve them.

**Storage of Data**

Your data will now be retained for a period of 3 years before being destroyed. Your data will remain accessible to only the researchers and supervisors.

**What should I do if I have concerns about this study?**

A full outline of the procedures governed by the University Teaching and Research Ethical Committee are outline on their website <http://www.st-andrews.ac.uk/utrec/Guidelines/complaints/>
